PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) | Delivery Consultant AI/ML, ProServe — May - Oct 2026

- Built and deployed a **multi-tenant Bedrock/AgentCore pilot (A2A)** for client business workflows and knowledge Q&A. Implemented sovereignty and security requirements through **least-privilege access**, tenant/session isolation, storage and processing in approved regions, encryption at rest/in transit and private networking.
- Attended the Stockholm consulting and delivery bootcamp, OpenAI/NVIDIA workshops and AWS Paris Tech Summit.

Independent Consulting | AI/ML Consultant — Jun 2023 - May 2026

Supportful — Dec 2025 - May 2026

- Delivered a **production LangGraph sales copilot** connecting Salesforce and Gmail for lead qualification and Slack drafts for human review; deployed on AWS with Terraform and isolated databases/vector stores per tenant.
- Built a **production Salesforce MCP server (Python/FastMCP)** for sales teams to query and update CRM records within their existing permissions, **reducing manual entry** by completing multiple business actions in one conversation.
- Built stateful agent execution with memory, **retries/timeouts and failure recovery**, evaluations and human approvals.
- Co-built a client portal for engagement updates, action tracking and source-grounded meeting Q&A, with client-restricted data access; demonstrations to prospects contributed to **signed new client contracts**.
- Delivered a **live telephone booking agent** handling full calls for Saudi sports facilities; web/WhatsApp agents for bookings and payments, Arabic support, human handoff and **automated LangSmith evaluations**.

MOPO — Jun 2023 - Jan 2026

- Led delivery **from concept to production**, coordinating engineering and business priorities around client needs; built multi-LLM orchestration, tool calling and RAG for company Q&A and customer conversations.
- Deployed and maintained Docker services on **AWS ECS**, migrated to **PostgreSQL**, managed CI/CD and integrated transcription/translation APIs; supported client pitches and fundraising. **Product acquired by Act-On in Jan 2026**.

MinervaHub — Apr - Jun 2025

- Assessed knowledge-sharing needs across **25 fashion and luxury companies**; co-developed a portal blueprint, access requirements, Azure architecture recommendations and a roadmap for next-phase priorities and budgets.

TowardsChange — Sep - Nov 2024

- Piloted **self-hosted Mistral RAG** on client GPUs to keep documents and inference on premises. Separately, contributed hybrid retrieval and source-grounded Q&A to **FridayGPT in production**, using Azure AI Search.

Other clients: AI.skilled architecture/mentoring (3 engineers); ShebangNow recruitment AI; Traveln.ai travel/voice search.

SAVENCIA | Data Scientist Intern — Jul - Dec 2025

- Led **causal inference** on lactoferrin yields using Double Machine Learning and causal forests in Databricks; presented findings to R&D to demonstrate business value and support the case for greater investment in the data science team.

Mobile Arts | Machine Learning Specialist — Jun 2022 - Aug 2023

- Built a SageMaker traffic-allocation engine delivering **30% higher ad revenue** than manual allocation in a **controlled A/B test**; added AWS Lambda anomaly alerts for media buyers to monitor performance and earnings per click.
- Captured client needs; built Angular/.NET moderation with Amazon Rekognition and YOLOv8 logo detection on EC2.

Decentra Tech | Computer Vision Developer — May 2021 - May 2022

- Optimised YOLO with NVIDIA TAO to **60 FPS on Jetson Nano**; deployed DeepStream collision warnings and lane/sign detection on **Nano/Orin in vehicles**; trained detection/segmentation models on AWS GPUs.

Earlier: ML internships, Vee Smart / USJ (Jan-Apr 2021): BERT/LSTM review analysis and YOLOv3 grapevine detection.

EDUCATION

emlyon business school | Master in Data Science & Artificial Intelligence Strategy — 2024 - 2026

McGill University exchange | Montréal, Canada (2025) — LIFE Lebanon Scholarship

Université Saint-Joseph (ESIB) | Software Engineering Degree — 2018 - 2023

CERTIFICATIONS

AWS: Solutions Architect - Associate · Machine Learning - Specialty · AI Practitioner · Cloud Practitioner | **Azure** AZ-900 / AI-900 / DP-900
Claude Certified Architect - Foundations (Anthropic) · **PMP (PMI)** | Training: TensorFlow Developer · Stanford ML

LEADERSHIP AND RECOGNITION

Workshops delivered: BERT/SageMaker at BDD (~150 attendees); NLP deployment with the AWS community; training for university students and USEK staff (20+/session). **Speaker/co-host:** AWS re:Invent re:Cap at BDD (2026).
Judge: Startup Weekend Support (2024), EPITECH GenAI projects (2025). **Elected VP**, ESIB student committee.

TECHNICAL AND CONSULTING SKILLS

AI agents: LangGraph/LangChain, MCP/FastMCP, A2A, RAG, context management, guardrails, LangSmith evaluations.
ML & software: Python, TypeScript, PyTorch, Hugging Face, CV/NLP, causal ML, FastAPI, React, PostgreSQL.
Production & MLOps: Maintenance, CI/CD, automated and security testing, infrastructure as code, scalability.
Coding-agent workflows: Research, task decomposition and focused context; supervision of parallel agents, code/edge-case review, integration with existing code and project conventions, tests before pull requests.
Consulting: Client discovery, solution architecture, technical trade-offs, delivery planning and stakeholder alignment.
Languages: French (fluent) English (fluent) Arabic (native)
