PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) | Delivery Consultant AI/ML, ProServe | Jul 2026 - 31 Oct 2026 | Departure: reorganisation
- Conceived, built and deployed a multi-tenant Bedrock/AgentCore customer pilot with A2A for company knowledge Q&A, enterprise actions and multi-step workflows. Addressed data sovereignty and security through approved-region storage and processing, tenant/session isolation, role-based access, encryption and private networking.
- Built an AWS Transform modernisation prototype at Agentic August; contributed to a client Redshift proof of concept.

Independent Consulting | AI/ML Consultant — Aug 2023 - Jul 2026
- **Supportful (Dec 2025 - Jul 2026):** Delivered a LangGraph sales copilot for lead qualification and human-reviewed Slack drafts, connecting Salesforce and Gmail; deployed a tenant-isolated product on AWS with Terraform.
- Built a production Salesforce MCP server in Python/FastMCP, enabling sales teams and leadership to query and update CRM records with their existing roles and permissions; reduced manual entry by completing multiple actions in one conversation.
- Engineered the sales-agent harness with workflow state, memory, failure recovery, evaluations and human approval controls.
- Built a client portal for engagement tracking and cited meeting Q&A; demos contributed to signed client contracts. Delivered production AI for a global bank's earnings-call preparation, investment-fund contract review and industrial product Q&A.
- Delivered production AI for Saudi sports facilities: web/WhatsApp booking and payment workflows, telephone booking and conversational React charts on revenue, staffing and trainers; enabled Arabic, image/voice input and human handover.
- **MOPO (Aug 2023 - Dec 2025):** Led the AI platform from concept to production launch, aligning engineering and business stakeholders. Enabled company knowledge Q&A and customer conversations using multi-LLM agents and RAG; led AWS deployment, PostgreSQL migration and CI/CD; shaped product priorities and contributed to client pitches and fundraising.
- **MinervaHub (Apr - Jun 2025):** Assessed communication and knowledge-sharing pain points across 25 fashion and luxury companies; co-developed an AI portal blueprint and roadmap to guide next-phase priorities and budget planning.
- **TowardsChange (Sep - Nov 2024):** Piloted on-premise Mistral RAG to keep documents and LLM processing within client infrastructure. Separately, contributed retrieval and cited Q&A to FridayGPT's production Azure AI Search product.
- **Other clients:** AI.skilled architecture/mentoring (3 engineers); ShebangNow recruitment; Traveln.ai RAG/voice search.

SAVENCIA | Data Scientist Intern — Jul - Dec 2025
- Led causal analysis of lactoferrin yield drivers using Double ML and causal forests in Databricks; translated findings into causal diagrams and process recommendations for R&D and engineering teams to inform manufacturing decisions.

Mobile Arts | Machine Learning Specialist — Jun 2022 - Aug 2023
- Delivered **30%** higher ad revenue than manual allocation in a controlled A/B test of a SageMaker traffic-allocation engine. Built AWS Lambda anomaly alerts to help media buyers monitor campaign performance and earnings per click.
- Turned client needs into Angular/.NET image/video/text moderation tools and YOLOv8 logo detection on AWS EC2.

Decentra Tech | Computer Vision Developer — May 2021 - May 2022
- Optimised YOLO to **60 FPS** on Jetson Nano using NVIDIA TAO for real-time edge inference; deployed collision warnings and lane/sign detection with DeepStream on Nano/Orin. Trained detection and segmentation models on AWS GPUs.

Vee Smart and USJ | Machine Learning Internships — Jan - Apr 2021
- Built BERT/LSTM sentiment analysis and NER on reviews; trained YOLOv3 for Château Kefraya grapevine detection.

EDUCATION

emlyon business school | Master in Data Science & Artificial Intelligence Strategy — 2024 - 2026
McGill University exchange | Montréal, Canada (2025) — LIFE Lebanon Scholarship
Université Saint-Joseph (ESIB) | Software Engineering Degree — 2018 - 2023

CERTIFICATIONS

AWS: Solutions Architect - Associate · Machine Learning - Specialty · AI Practitioner · Cloud Practitioner | **Azure** AZ-900 / AI-900 / DP-900
Claude Certified Architect - Foundations (Anthropic) · **PMP (PMI)** | Training: TensorFlow Developer · Stanford ML · ZAKA AI

LEADERSHIP AND RECOGNITION

Beirut AI (2021-2024): Delivered AI training (~150 attendees). **ZAKA (2026):** Led 3 AI marketing sessions for Fair Trade Lebanon and USEK staff training (20+/session); participants completed practical tasks and clients requested further training. Speaker, AWS re:Invent 2025 re:Cap community event (2026); AWS Associate Speaker. Won AUB Tech for Accessibility Hackathon; judged startup and GenAI projects at Startup Weekend Support (2024) and Epitech, MWC Barcelona (2025).

TECHNICAL AND CONSULTING SKILLS

Agents: LangGraph/LangChain, RAG, MCP/FastMCP, A2A, harness/context engineering, guardrails, LangSmith evaluations.
ML & software: Python, TypeScript, PyTorch, Hugging Face, CV/NLP, causal inference, FastAPI, React, PostgreSQL, Neo4j.
Cloud & MLOps: AWS (Bedrock, AgentCore, SageMaker, ECS), Azure AI Search, Docker, Terraform, CI/CD.
Consulting: Working backwards from client needs; prioritisation, solution architecture, roadmaps and stakeholder alignment.
Languages: French (fluent) English (fluent) Arabic (native)
